

INTERACTIVE 3D EXPERIENCE

CA1: Asg1 Ideation using PAIR

CA1 BRIEF

- As a beginner Unity developer, it can be tough trying to bring your ideas to life in Unity.
- This CA will aim to help you have a clearer picture of the tasks that you need to complete Assignment 1.
- You will use a GenAI tool of your choice to help you design and plan out your Assignment 1.

CA1 TASKS

TASK 1

Come up with an idea that you would like to implement for Assignment 1. *(either by yourself or using GenAI to ideate)*

TASK 2

Share the Asg1 Brief and your idea to a GenAI tool and have it create an implementation plan for your idea. Create a checklist of tasks you need to complete to create your idea in Unity.

TASK 3

Submit the checklist on BrightSpace and post a reflection on your PAIR forum page.
